

Welch Allyn Uniscope™
Single-Patient- U S E S T E T H O S C O P E S

AFFORDABLE AUSCULTATION
WHENEVER SAFETY COMES FIRST

Cross-contamination is a critical concern in today's fast-paced hospital and clinical settings. That's why Welch Allyn manufactures Uniscope Single-Patient-Use Stethoscopes. With Uniscope, hospitals and other medical settings can have an accurate and affordable means to test a patient's vital signs, while eliminating the risks of cross-contamination. Uniscope stethoscopes are available in three basic configurations: pediatric, adult and extended length for anesthesiology. What's more, they are color-coded to make identification easy. In short, Welch Allyn Uniscope Stethoscopes are the answer to your cross-contamination concerns - and all from a trusted, respected name in medical diagnostic instruments.

WelchAllyn™

THE PERFECT SOLUTION FOR ANY SITUATION,

Welch Allyn Uniscope Stethoscopes are designed to give medical professionals an accurate and cost-effective method to reduce the risks of cross-contamination. Some of the many practical settings for Uniscope use are:

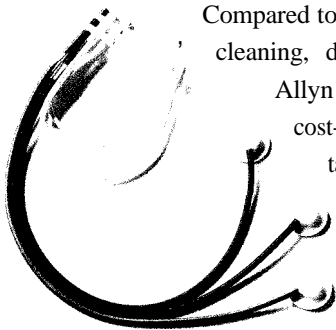

Hospitals, emergency rooms, intensive care units and isolation wards:

The fast pace and quick traffic flow of today's hospital settings often do not leave sufficient time for effective decontamination of traditional stethoscopes. With Uniscope, a new, uncontaminated stethoscope can be used on one patient and then properly disposed.

Nurseries and well-baby wards:

Special pediatric sizes help provide accurate results in nurseries or other situations involving young patients who are more susceptible to infections resulting from cross-contamination.

AN AFFORDABLE WAY TO AVOID
CROSS-CONTAMINATION

Compared to other prevention methods - including cleaning, disinfection or sterilization - Welch Allyn Uniscope Stethoscopes are a highly cost-effective alternative. But more importantly, Uniscope stethoscopes also offer the peace of mind that comes from knowing your patients are safe from cross-contamination.

ACCURATE AND RELIABLE
PERFORMANCE

Each Welch Allyn Uniscope Stethoscope delivers the accurate results that are expected from a conventional stethoscope - but at just a fraction of the cost. This reliable performance makes Uniscope ideal for auscultation and blood-pressure measurement in all situations,

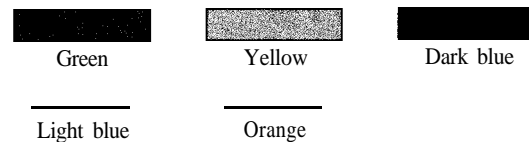

- Color-coding: a variety of colors help make identification and isolation easy.
- Lightweight: Uniscope's lightweight construction allows them to be easily carried and stored.
- Pediatric Sizes: Uniscope models with smaller chest pieces provide more accurate results on smaller patients.
- Special Anesthesiologist Model: designed with extra length for additional ease-of-use in operating room situations.
